# ExtremeXP

Dear subscribers,

The ExtremeXP project continues to evolve, and we're delighted to bring you the latest updates about our site.

🌐 We are excited to announce that **our website** now offers even more features to enhance your experience ! You can easily access the **ExtremeXP logo** along with a wide range of **communication tools**. Additionally, **deliverables** are now available directly from the platform, enabling smoother access to valuable resources.

🌐 Our updated interface ensures easy navigation, making it simpler than ever to find what you need. And don't miss out—**the Software page** will be launched soon, so stay tuned for more exciting updates !

Stay tuned for more updates, we're committed to continuously improving your experience with ExtremeXP. Thank you for your support !

The Collaborator
Of The Month

YIANNIS VERGINADIS

Yiannis is an Assistant Professor in Management Information Systems in the Department of Business Administration at the Athens University of Economics and Business (AUEB).

He is also a **senior researcher at the Institute of Communication and Computer Systems (ICCS)**, Athens, Greece which participates in ExtremeXP.

He has more than 15 years of experience in ICT projects in several research areas such as : **management of information systems, workflow management, complex event processing, cloud computing and cloud security.**

He holds **Diploma and Doctoral degrees in Electrical and Computer Engineering from the National Technical University of Athens**, Greece. He has worked as **an adjunct lecturer in the department of Mechanical and Industrial Engineering of the University of Thessaly and as an adjunct lecturer in the Technological Educational Institute of Kalamata.**

In his current role, Yiannis is contributing to ExtremeXP, specifically in **Task 2.3 on Traceability and trustworthiness for experiment-driven analytics and in WP5**, where he is a **Task 5.5 leader, on an Adaptive experiment-driven complex analytics framework**.

Specifically, he focuses on **research and development** of :

i) a Non-Fungible Token (NFT)-based **dataset provenance mechanism for transparently** and **immutably 'tagging'** with metadata the datasets used for experiment-driven analytics.

ii) a context-aware **access control for experiment-driven analytics.**

iii) on the **secure management of decentralized data and knowledge** for and from experiments.

The Partner
Of The Month

IDEKO MEMBER OF BASQUE RESEARCH & TECHNOLOGY ALLIANCE

IDEKO is an **industry driven Spanish Technological Centre specialized in machine tools and advanced manufacturing technologies, with the aim to promote technological innovation of its customers.** It is **part of DANOBAT Group** machine tool builder and has a clear orientation towards the development of new products and the improvement of production processes.

IDEKO fine-tunes the **strategy and development of its customers to become a decisive factor in their competitiveness.** Typical customers are renowned **machine tool manufacturers who are strongly committed to innovation.** The company's activity covers the **identification and analysis of opportunities**, **the design and development of products, business lines and production processes and the resolution of problems through the provision of technological services such as technical consultancy and equipment based services.**

IDEKO is known for **the scientific excellence developed in 4 research groups** which are aimed at advancing the specialisation. The organisational model encourages **interdisciplinary work and takes special care in the qualification and professional development of the staff.** IDEKO has the most up to date **facilities and equipment** and is committed to collaborative work through the establishment of a wide range of contacts with **leading centres at an international level**.

The ExtremeXP project is co-funded by the European Union Horizon Program HORIZON-CL4-2022-DATA-01-01, under Grant Agreement No. 101093164
